

Paper Fanoos Lantern · Template

Colour · Cut the solid lines · Fold the dashed lines · Glue the grey tabs

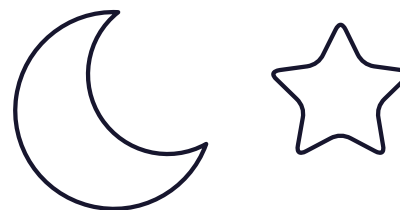

1 Lantern body

2 Roof

3 Handle

4 Moon & star toppers

— cut - - - - fold glue

Print at 100% (actual size). Card stock (160–200 gsm) makes the strongest lantern.

How to Make Your Paper Fanoos

Ages 4–8 with a grown-up · About 30 minutes

You will need

crayons or pens

scissors

glue stick

battery tea-light
(optional)

1

Colour the lantern body, the roof, the handle and the toppers. Bright colours look like glowing glass!

2

Cut along all the solid lines. Grown-ups: help with the roof and its little tabs.

3

Fold along every dashed line and press the creases flat with your thumb.

4

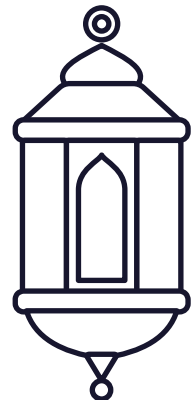

Roll the body into a square tube and glue the grey tab inside the other edge.

5

Fold the roof into a pyramid and glue its side tab. Put glue on the four small tabs and push them inside the top of the tube.

6

Glue the handle across the roof, stick on the moon and star, and hang your fanoos for Ramadan!

Safety: light your lantern with a battery tea-light only – never a real flame.
